READER RESPONSE FORM

Name: .....Andrie Detera..... Section: TX05 Date: ...03/21/24... Score: ...../50

Title of Reading Selection: .....

**Summary**

Direction: Write a one-paragraph (approximately 10 sentences) summary of the reading selection. It should include the title of the reading selection, the author's name, author's thesis, and supporting points.

Jamshidi et al. published a scholarly study titled Artificial Intelligence and COVID-19: Deep Learning Approached for Diagnosis and Treatment, which focuses on the use of artificial intelligence in the fight against COVID-19. With the abrupt advent of the COVID-19 virus, the entire world scrambled to resist it. Many people have died because of the infection because they lacked the necessary knowledge and measures. With the virus spreading quickly and the death toll growing by the day, the medical community was fighting to combat the COVID-19 infection. Artificial intelligence, or AI, can do or learn tasks without being explicitly instructed. According to the research paper, artificial intelligence is extremely useful in combating the COVID-19 virus. Its ability to learn allows it to be fed data and process a great amount of it, which a person would struggle to do. Deep Learning, a subset of AI, is supposed to use various methods of learning to diagnose and cure patients. In contrast to machine learning, deep learning can handle complicated tasks such as decision-making. The research paper discusses how Artificial Intelligence is used in the medical industry to fill in and complete activities that people cannot do due to its superior processing capabilities.

Title of Reading Selection: .....

**Response**

Direction: Write a one-paragraph (approximately 10 sentences) response to the reading selection. It should include your reaction to the author's thesis, and assessment of author's achievement of the text's purpose, clarity, and objectivity.

The scientific paper is an important piece of research. This study investigates the growing trend of AI's application in the medical field. I feel that Artificial Intelligence can be used in medicine because it simplifies and speeds up the diagnostic process. However, I do not believe they should replace doctors and nurses. Instead of replacing humans, AI should be used to help them. Although the paper discusses how AI should do the diagnosis and therapy, I believe the authors succeeded in persuading the audience that AI should be employed to assist tackle COVID-19. AI should, in my opinion, merely assist with information processing; physicians should make the final decision. Physicians and other authorized medical professionals should be the ones treating patients, and AI should assist in processing any potential illnesses patients may have so that doctors ultimately have the last word over the patient's condition.

## READER RESPONSE FORM

Name: .....Andrie Detera..... Section: TX05 Date: ...03/21/24... Score: ...../50

Title of Reading Selection: .....

This reader response will be evaluated based on the criteria below:

Criteria	6-10 Points	1-5 Points	Score
Comprehension	Summary demonstrates understanding of main idea and supporting points in the source text	Summary contains inaccurate information.	
Critical Reading	Response demonstrates sound reasoning in reacting to author's thesis and in justifying analysis and assessment of the text's communicative value	Response contains one or more logical fallacies.	
Clarity	Ideas in sentences are clearly stated. <ul style="list-style-type: none"> <li>Provides pertinent details of the text (i.e., title, author's name, some publication details) in an introductory sentence.</li> <li>Uses transitional devices and accurate words</li> </ul>	Ideas in sentences are not clearly stated.	
Completeness	Important ideas/information from the text are quoted to prove reader's reaction/rhetorical analysis.	Lacks ideas/information from text which is necessary to prove reader's reaction/rhetorical analysis.	
Conventions	Writing displays correct grammar, spelling, and mechanics.	Writing displays incorrect grammar, spelling, and mechanics.
